

## Ripping Thin Sheets

Sunday, 06 May 2007

Last Updated Sunday, 06 May 2007

Eugenio Hamm from Universidad de Santiago will give an account about how fracture is produced on different materials that are used for packaging, taping or just decoration. He will show how geometry interact with material properties to define the crack trajectory along the sheets.

The seminar will take place next Tuesday at 14:30 in the laboratory of NonLinear Physics (DFI downstairs).

Best, Enrique.
